

Divyansh Shakya

DevSecOps / Cloud Security Intern

Bhopal (M.P.), India

divyanshakya.dev@gmail.com

↗ Open Portfolio

SUMMARY

Computer Science undergraduate specializing in Cybersecurity, focused on DevOps, DevSecOps, cloud security, and secure software delivery. Hands-on experience with Linux, Git/GitHub, Docker, Kubernetes, Python, and Bash, supported by practical cybersecurity training and open-source collaboration. Interested in building automated CI/CD workflows, securing cloud-native infrastructure, and integrating security throughout the software development lifecycle.

EXPERIENCE

Open Source Contributor

May 2026 – July 2026

GSSoC 2026

- Collaborated on open-source projects using Git/GitHub, issue tracking, pull requests, testing, and code contributions.
- Worked with maintainers and contributors on feature improvements while exploring secure software development and AI-integrated systems.

Cybersecurity Trainee

Feb 2026 – Present

Hack The Box / TryHackMe

- Developed hands-on experience in Linux, reconnaissance, vulnerability assessment, penetration testing, and web application security through practical labs.
- Built foundational knowledge across DevSecOps, security engineering, cloud security, and AI security through continuous hands-on training.

EDUCATION

Oriental College of Technology

2025-2029

Bhopal (M.P.), India

Units covered: business communication, project management basics, organisational skills, and professional workplace practice.

SKILLS

DevOps & DevSecOps: Docker, Kubernetes, Git, GitHub, DevSecOps, CI/CD fundamentals, SSDL

Cloud & Infrastructure: Cloud Security Fundamentals, Infrastructure Security Fundamentals, Containerization

Security: Web Application Security, Security Testing, AI Security Fundamentals

Programming & Scripting: Python, Bash, C, C++

Systems & Tools: Linux, Git/GitHub, Docker, Kubernetes

PROJECTS

AegisStack: AI-Powered DevSecOps Security Assistant

Python • LLMs • DevSecOps • Security Automation

ACHIEVEMENTS

- Top 1% Ranking on TryHackMe:** Ranked among the top 1% of users through hands-on cybersecurity labs and challenges.
- Open-Source Contributor at GSSoC 2026:** Selected as a contributor and participated in collaborative open-source development through Git/GitHub workflows.
